# ADVANCED COMPUTER ARCHITECTURE

Emanuele Torti

Tel. 0382 985371
e-mail: emanuele.torti@unipv.it

Time table: Friday 9 – 11
B4 room

Reception: Wednesday 14 – 16

# Teaching material

- Book:

  John L. Hennessy, David A. Patterson

  Computer Architecture. A Quantitative Approach

- Lectures Slides + handouts

- Documents from the course websites:

  Kiro (available soon)

# Exam Rules

- **Exam calls**
  written test with theoretical questions and exercises

- **Individual project on GPU programming (optional)**
  developed on personal equipment, but must run on UNIPV machines and discussed with an oral presentation

- **Maximum grade without project is 26**

# Course Program

**Requirements:** assembly language, fundamentals of computer architecture, operating systems

- Memory hierarchy design
- Cache and coherence
- Virtual memory
- Performance modeling
- Storage systems
- I/O architecture
