

Grids: alignment and consistency

Grids make the layout consistent across pages while still offering a large number of options.

The Anatomy of the Grid

Same grid, different layouts

Same grid, different layouts

Standard four column layout.

Layout variation with four columns. Three of them for main text and the main image on top with a caption below and one column serving as a sidebar.

Same grid, different layouts

Layout variation with five columns.

Five columns give you much more flexibility.

Six column layout does not have to be used as two-three column blocks. You can use one narrow column for small image and caption.

Seven column layout. This is also a great number of columns because it gives you even more options for your design.

Same grid, different layouts

Magazine layout with nine columns. With so many columns you can have several options how to lay out your pages.

Twelve column layout. It gives you so many options on how to lay out your text and image blocks. Rarely used in magazines, more often in newspapers.
